* Make Your Dreams Come True

Innovation as driving force

Soichiro Honda once said: "We have only one future, and it will be made of our dreams, if we have the courage to challenge convention". Ever since the Honda Motor Corporation was founded in 1948, we have lived by this philosophy. Always challenging the status quo, always asking questions, always learning. Striving to make the impossible possible. Big dreams can move mountains. Today, Honda develops reliable and innovative products for a broad array of applications - from lawn mowers to corporate jets. With every product designed to make life more joyful for you and less impactful to the planet. Where will our dreams take us next?

HondaJet

Why can planes not be made cheaper, more energy-efficient and more environmentally friendly? At Honda we believe in stretching the boundaries of human mobility whether it is on the road, on the track or in the sky. In 1997, a revolution was born from a simple idea. Instead of installing the engine under the wing, as in standard aircraft, we decided to mount it over the wing. In 2000, HondaJet's progress was such that a new research facility was established exclusively for its development. Today HondaJet is operational. With its all-composite fuselage, it is lighter, quieter, more fuel-efficient, while at the same time emitting only 40% of the pollutants of comparable aircraft.

FCX Clarity

What if we could build a car with zero emissions? For more than two decades, our engineers have been looking for ways to challenge conventional thinking on how to make cars. Powered by an electric engine, the FCX Clarity produces no CO_2 emissions. Since we unveiled our first fuel cell vehicle in 1999, we have brought the revolutionary FCX right from the lab to the fleet and now, to the public.

Motorcycles

No one is better placed than a biker to feel the sensations and to be able to define the needs for improvement with a view to enhancing user comfort. This is the approach we adopted to improve the emergency braking system (DCT system) of our motorcycles. This new technology is used not only in the Moto GP championship, where we accumulate the wins, but also in everyday life, offering users perfect road holding. What is more, all our innovations are applied in all models, from 50 cc to 1,800 cc such as the Gold Wing.

Miimo Robotic Lawn Mower

As the No. 1 in thermal mowers and being at the forefront of robotic technologies, it is only normal that we manufacture the mower of tomorrow. We have therefore launched our first robotic lawn mower, Miimo. Created and designed for both performance and discreetness, this new mower revolutionises the daily lives of gardeners. The result is a beautiful and healthy lawn, achieved without any stress or effort.
Based on perimeter wire technology, it operates automatically and when its battery is running low it returns to the home base for recharging. Fitted with various safety sensors, it is perfectly safe and does not pose any risks to persons. You can enjoy your garden while Miimo takes care of your lawn.

ASIMO

What if we could create products that can help with important tasks like assisting the elderly or a person confined to a wheelchair? Or perform tasks that are considered hazardous for humans, such as fighting fires? Back in 1986, our engineers made this dream a reality when they completed work on ASIMO, the world's most advanced humanoid robot. ASIMO reproduces human walking and running movements in an intelligent manner and is equally at ease on slopes and uneven surfaces. It is capable of turning, climbing stairs and grasping objects. ASIMO can even respond to simple commands and recognise faces in a small group of individuals. With its cameras, ASIMO is also able to create an accurate map of its environment to easily navigate around stationary and moving objects.

BLUE SKIES FOR OUR CHILDREN

Ever wished for a world in which our children can enjoy a free and sustainable future?

At Honda, this vision is nothing new for us. As pioneers of environmental technologies, our engineers have been exploring ways to make it happen for the past 40 years. Today, sustainability is still top of our agenda.
In June 2011, we pledged to cut CO_2 emissions from all our products and corporate activities by 30% by the end of 2020 compared to 2000 levels. We are also firmly committed to powering our vehicles with innovative renewable technologies wherever we can.

The genuine Honda part

Honda recommends the exclusive use of Honda Original Spare Parts and Accessories.

Meeting very strict requirements, they **guarantee Honda quality** for you and **maximum comfort and safety** in use for our customers.

Our commitment is to offer and supply you with a complete range of **top quality** spare parts, accessories, lubricants and **reliable** maintenance solutions **to ensure the longevity of our products.**
It is our role - and yours as a representative of the brand - to recommend the use of Honda original parts.

Honda Motor Corporation will not be able to ensure the Honda quality and guarantee if you fit other spare parts onto Honda products.

Honda Original

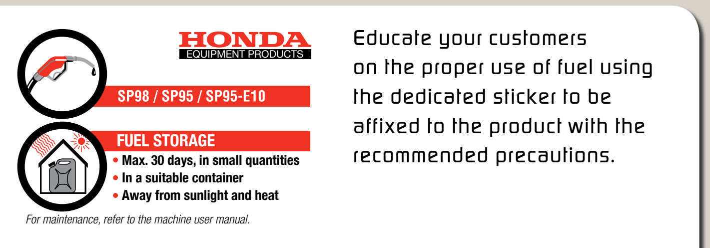

Connect your PC with Dr H to compatible Honda products to obtain a complete diagnostic of your machine.

Dr H enables you to boost the productivity of your workshop, the quality of your service and to easily capture the usage history of the product (reference: 06398-YH0-010).

Dr H is also available in a waterproof version: 06395-YH0-010.

Store your fuel properly

To back up our recommendations, Honda provides you with tools to protect your fuel:

Educate your customers on the proper use of fuel using the dedicated sticker to be affixed to the product with the recommended precautions.

HONDA
The Power of Dreams

**The following tips apply to all HONDA PRODUCTS and Honda motorised products.
For more information, CONSULT a true professional:
your AUTHORISED HONDA DEALER.**

PROPER FUEL USE

... < 1989 < **1990** > 2000 > ...

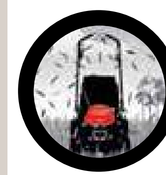

Your machine uses **premium** or **regular fuel:** use **SP98** or **SP95** with **a lead substitute additive.**

Your machine uses **unleaded fuel**: use **SP98** or **SP95** or **SP95-E10.**

Improve the quality and storage life of your fuel by adding a petrol stabilizer, Honda PRO fuel stabilizer

PROPER FUEL STORAGE

- **Store for a short period (max. 1 month).**
- **Store in small quantities (max. 1 can).**
- **Use a leakproof container suitable for hydrocarbons.**
- **Store in a cool, ventilated place away from sunlight.**
- **Use a stabiliser to extend storage life.**

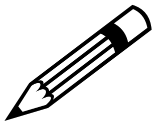

PROPER STARTING OF YOUR MACHINE

- **During use, consume fuel stored for less than 1 month or fuel treated with Honda PRO fuel stabilizer.**
- **Before winter, drain the carburettor bowl, the fuel tank and follow the maintenance/storage tips given in the user manual.**
- **Make an appointment with your authorised Honda dealer for winter maintenance.**

Pedestrian mowers

Mulching

Mulching

For good mulching, mowing must be done on short grass, at regular intervals, to reduce the height of the grass being cut. Under the action of the twin blades and the cutter housing, the grass is recycled inside the cutter housing and reduced to finely chopped strands, spread evenly over the lawn.

Mulching has several advantages

Save time You no longer need to remove the cut grass: there is no more need to empty the mower bag, which amounts to half the time spent mowing.

A healthy lawn
mulch provides natural nutrients to the lawn as it breaks up and prevents it from drying out during the summer.

No grass clippings:
it saves walks to the compost heap. You no longer need to go your local waste disposal site.

This sign tells you to be careful during certain operations, notably concerning the blade tightening torque. Please refer to the safety instructions in the machine's user manual.

Multipack available: see p. 10

Pedestrian mowers

Chassis parts

➔ **The Honda RotoStop kits,** complete and hard-wearing, prolong the life of your machine (delivered with cable, belt, pulley and bolts).

This sign tells you to be careful during certain operations, notably concerning the blade tightening torque. Please refer to the safety instructions in the machine's user manual.

Ride-on mowers

Accessories

Think about **protecting your equipment** once the work is done with the **new protective cover** developed by Honda!

INDISPENSABLE!

The Honda ride-on mower lifting jack allows full maintenance and cleaning of the machine in complete safety with just a few turns of the handle!

USEFUL!

The OPTIMATE 12V automatic battery charger charges, recovers and maintains all lead acid batteries with capacities from 2.5 Ah to 32 Ah. It is used for (normal, GEL, MF) lead acid batteries of ride-on mowers, generators and snowblowers.

Delivered with alligator clips and charge adapter to be attached to the battery.

PRACTICAL !

Mower deck scraper

The GOKO 350 deck cleaner/scraper is the ideal accessory for cleaning lawn mowers.

Ride-on mowers

Mulching

➜ This **kit** offers several advantages:

Savetime You no longer need to remove the cut grass: there is no more need to empty the mower bag, which amounts to half the time spent mowing.

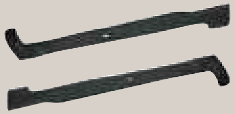

A healthy lawn
the mulch provides natural nutrients to the lawn as it breaks up and prevents it from drying out during the summer.

No grass clippings:
no more walks to the compost heap

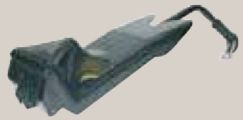

This sign tells you to be careful during certain operations, notably concerning the blade tightening torque. Please refer to the safety instructions in the machine's user manual.

Our complete nylon wire range

Our high-quality wire ranges for all Honda brushcutters:

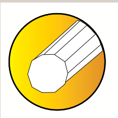

The SILENT Twisted Wire Line

The SL range

Due to its spiral shape, the SL twisted nylon line works silently: noise and vibrations are reduced. Its structure allows not only better air penetration but also better cutting efficiency.

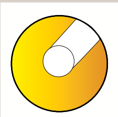

The HIGH STRENGTH Angular Wire Line

The WX range

With 10 outside edges and 5 inside edges, the WX angular nylon line has a unique structure designed to increase cutting efficiency and giving it superior strength.

The ROUNDWIRE Line

The RL range

The original nylon line is an economical solution for unbeatable cutting comfort.

Cutting tools

New

Discover our pruner head which transforms your brushcutter into a real pruner capable of cutting branches from the soil.

The varied range of accessories for Honda brushcutters make them a complete and indispensable tool for all garden work.

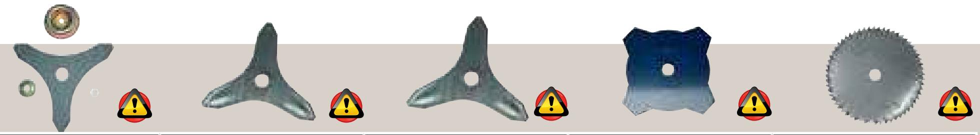

The pruner head for Honda brushcutters: an ideal alternative for cutting branches at height in perfect comfort.

Every tool has its own use:

- **3-tooth blade:** ideal for cutting spiny hedges and thick scrub.
- **4-tooth blade:** recommended for mowing large grassy areas.
- **80-tooth blade:** suitable for mowing high, dry grass (e.g. reeds).

This sign tells you to be careful during certain operations. Please refer to the safety instructions in the machine user manual.

Accessories

The tiller accessories presented in this catalogue have been approved in accordance with the Machinery Directive. The installation of any other equipment on a Honda tiller makes you responsible as manufacturer of the equipment and its accessory.

Honda tillers are versatile and their complementary accessories allow them to be used throughout the year. So, depending on the engine, a single model can drive a rotary cutter, a border edger, an aerator, a de-thatcher, or a shredder tool.

- **The standard rotary tool (cutter kit)** gives the soil a suitable consistency for plant growth. The number of blades varies according to the work and the power of the machine.
- **The shredder kit** prepares and refines the soil by breaking up the clumps of earth.
- **The ridger** is a plough fitted with two ears that can be adjusted depending on the amount of space between the rows of plants. Passing between these rows, the ridger makes a furrow and deposits the soil at the foot of the plants on each side.
- **An adjustable transport wheel** can be fitted to the front of the tiller to facilitate transport and increase manoeuverability.

- **The complete Kit:** This versatile kit combines three indispensable accessories to aerate the soil, eliminate moss and manage the ground.

❶ **De-thatcher:** An abundance of moss can smother your lawn and tends to turn it yellow. The de-thatcher rakes and clears your lawn without damaging it.

❷ **Aerator:** Aerating the soil allows healthy growth of the lawn. The whole area must be worked twice at right angles.

❸ **Border Edger:** This tool is useful for cutting borders and allows portions of turf to be cut and collected for new arrangements.

Tillers

Standard rotary tools

Honda tillers are versatile and their complementary accessories allow them to be used throughout the year.
The front and rear mounting devices can be used on all types of equipment.

The standard rotary tool:

This versatile tool is the basic tool for the tiller. When used in combination with the drag bar at the rear of the tiller, it can be used to dig, till, cultivate, weed, fertilise and refine the soil. Depending on the desired working width and the type of engine, 4 to 8 tines of 4 blades each can be fitted. A plant protection disc can be fitted at each end and can be removed for deep tilling.

Special rotary tools

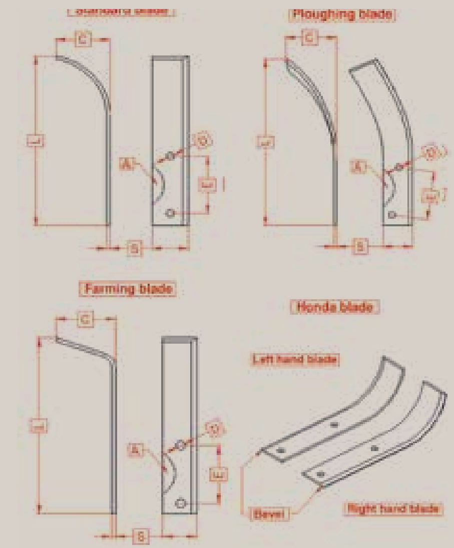

Rotary ploughing and farming tools:

The rotary farming tool uses specially curved blades to cut up the roots. There are 6 of these blades on a standard tine or 8 on double tines. The tool is equipped with plant protection discs, which also limit the working depth.

Rear cutter

The rear cutter is a rotary tool linked to the tiller equipped with wheels (identical for ploughing). Its high rotating speed allows very finely worked soil to be achieved.

Note: In accordance with Machinery Directive EN709, the rear cutters marketed by Honda as detailed below may be sold only as spare parts for the following models: F560K5, F720K1, F810K3.
The installation of these rear cutters on models higher than the aforementioned ones, makes you responsible as manufacturer of the equipment and its accessory.

Rear cutter only		
	Reference	Working width
F560 (1)	01261-960-013FM	0.60 m
F720 (2)	01259-960-013FM	0.67 m
F810 (3)	01260-960-013FM	0.685 m

(Subject to stock availability)

Accessories and maintenance

➲ **Connection cables for parallel operation** are available for generators in the EU range. One cable allows 2 **identical** generators to be coupled, doubling the available power.

Connection cables for parallel operation		
	Reference	Description
EU10i	32360-ZC3-000	Allows connection of 2 EU10i: Rated output in parallel operation: 1800 VA Max. output in parallel operation: 2000 VA
EU20i	32360-Z07-C61 Up to Serial No. 1725107 32360-Z07-C63 From Serial No. 1725108	Allows connection of 2 EU20i: Rated output in parallel operation: 3200 VA Max. output in parallel operation: 4000 VA
EU20ik1	32360-Z07-C63	Allows connection of 2 EU20iK1: Rated output in parallel operation: 3200 VA Max. output in parallel operation: 4000 VA
EU20iT1	32360-Z07-C63	Allows connection of 2 EU20iT1: Rated output in parallel operation: 3200 VA Max. output in parallel operation: 4000 VA
EU26i	32360-Z28-C61	Allows connection of 2 EU26i: Rated output in parallel operation: 4.8 kVA Max. output in parallel operation: 5.2 kVA

Generator sets

Transport kits

➲ Think about **transport kits** that allow Honda generators to be moved with minimum effort. They are particularly useful on building sites.

➲ The **Lifting kit** facilitates lifting of the generator. The hook is also useful for securing the generator so as to avoid theft.

Generator sets

Remote controls and accessories

- The **remote control unit** allows Honda generators fitted with an electric starter to be started remotely. Combined with a changeover switch, this assembly guarantees electric power supply to the equipment in the event of a power failure.

- The **remote control kit** allows the generator to be started even when it is inaccessible.

Engine parts

➔ The Honda rubber **tracks** are strong and give the power carrier a strong grip on all types of terrain (sand, mud, snow), even on steep slopes (up to 25° climbing and up to 15° descending). The tracks are also ecological because they limit damage to soil in mushroom farms, around vines, or on mountains.

Oil and fuel filters

Honda recommends Honda Genuine Oil HGO

Honda recommends HGO "Honda Genuine oil"

Our four stroke engine oil 10W30 API SJ is a fine mineral based oil, formulated for use with our Honda Engines Motors. High quality solvent refined base oil.

Our Synthetic oil 05W30 APJ SL JASO MA has a:

- Superior protection against engine wear at low and high operating temperatures.
- Excellent anti rust performance
- Outstanding engine cleanliness
- Reduced oil / fuel consumption

Stabiliser:

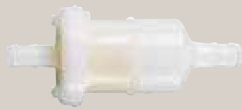

- The petrol stabiliser allows the fuel to be stored for up to 24 months.
- The use of the stabiliser facilitates starting after wintering.
- The stabiliser avoids the accumulation of deposits and varnish by keeping the carburettor and the supply circuit clean. Reference: 08CXZ-FSC-250 qty 12 x 240 ML
